**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 75-102 are rejected under the judicially created doctrine of double patenting over claims 1-20 of U. S. Patent No. 5,546,445 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter. Although the conflicting claims are not identical, they are not patentably distinct from each other because similar terminology is used to describe identical elements.

For example (Patent No. 5,546,445) discloses, a cellular communication network comprising a plurality of cell sites and a plurality of mobile units (fig. 7), for radio frequency communication between said cell sites and mobile units, at least one of said cell sites receiving an identification of a specific mobile unit, said cellular communication network communicating with said mobile unit via a cell site chosen based upon signal strength, a positioning system obtaining a position for said specific mobile unit identifying an exact geographic location of the

Art Unit: 2684

specific mobile unit, a data storage system for recording said exact geographic location and specific mobile unit identification for use in subsequent services (col. 6, line 51-col. 7, line 27).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Allowable Subject Matter***

Claims 66-74 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 66, 69 and 74, the prior art of record, specifically Wang et al (US 5,365,451) & Emery et al (US 5,727,057), teach a wireless radio communications system, such as a cellular telephone system, that includes a plurality of land based elements, one or more sources of data storage and at least one MTSO, and at least one mobile telephone unit, comprising locating means in at least one of a mobile unit which can operate from a non-fixed location and a radio communications system for determining the exact geographic location of the mobile unit and management means for making data management decisions based on the exact geographic location of the mobile unit, said management means including means for storing geographic data for each element and for making a comparison between the exact geographic location of the mobile unit and the land based data stored in said management means (see Wang col. 1, line 57- col. 2, line 14). However, the prior art of record fails to specifically disclose means in said management means for making data management decision based on said

Art Unit: 2684

comparison and means for routing a call from the mobile unit to an element selected by said mobile unit based on the exact geographic location of the mobile unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,727,057 Storage, transmission, communication and access to geographical positioning data linked with standard telephony numbering and encoded for use in telecommunications and related services.

US 5,365,451 Mobile unit tracking system.
